## **Global Millet Summit (Shree Anna):**

**Dated:** 18<sup>th</sup> & 19<sup>th</sup> March 2023

**Venue:** IARI Campus, PUSA, New Delhi

**Organizers:** Govt of India , Apeda IARI , Pusa , New Delhi

### **Highlights:**

Students of the Department of Information Technology recently had the opportunity to attend the Global Millet Summit, which was held at IARI , Pusa , New Delhi on 18th & 19th March. As of this year 2023 is being declared as the **International year of Millet.**

The details of the event discussed below.

- The summit brought together experts, researchers, farmers, and policymakers from around the world to discuss the challenges and opportunities related to the cultivation, production, and consumption of millets.
- Millets are highly resilient crops that require less water and fertilizer than many other grains, and they are also highly nutritious. As such, they have the potential to be an important part of sustainable food systems, particularly in regions that are prone to drought and other climate-related challenges
- Overall, the Global Millet Summit was found to be innovative and valuable which deepened the understanding of the potential of millets to contribute to sustainable agriculture and food systems. We hope to continue to follow developments in this field and to support efforts to promote the cultivation and consumption of millet.

## **Event on Skill development programme on “Cyber Security” 11, MARCH 2023**

**Dated:** 11 March 2023

**Venue:** In IT Lab

**Organizers:** Department of Information Technology, ADGITM, New Delhi

### **Highlights:**

The Department of Information Technology, Dr. Akhilesh Das Gupta Institute of Technology & Management, New Delhi, organized an event skill development programme on “Cyber Security”.

**Dr. Anil Kumar and Ms. Sadaf Fatima** groomed the students to enhance their digital literacy and having basic knowledge of cyber security is a critical component of digital literacy and development also by explaining the importance of cyber security and various things which are discussed below.

- Awareness of internet with the advantages and disadvantages.
- Protecting personal information: As more and more of our personal information is stored online, it is critical to know how to protect it from cyber threats. Students who understand the basics of cyber security can take steps to protect their personal information, such as using strong passwords and avoiding phishing scams.
- Awareness about the Cybercrime. Cybercrime is any criminal activity that involves a computer, networked device or a network and risk associated with it .
- Understanding risks and threats: Students who are knowledgeable about cyber security can better understand the risks and threats associated with the use of technology, which

can help them make more informed decisions about how they use technology.

- Contributing to a safer online environment: Students who are knowledgeable about cyber security can play an active role in creating a safer online environment by sharing their knowledge with others, reporting suspicious activity, and advocating for better cyber security practices.
