Report on Application of Machine Learning in Multidisciplinary Streams in Engineering Workshop

Dated: 4/05/2023

Date of Event: 4th May 2023 (11:00 am- 12:30 pm)

Venue: Auditorium Hall ,DCURST University

Objectives: The objective of the event was to update students how machine learning is used in other streams of engineering like mechanical, Electronic etc.

Delegates (Speakers): Dr, Mirdual Chawala

Activities done: A one-day, hands-on workshop to understand the capabilities of use of ML in different steams was organized by ATAL Academy DCURST University. The students learn how to analyze the data in an electronic created by sensors and how it help in mechanical tools are efficient and have a greater impact on the workdone every day.

Key Takeaways:

- Manage workspaces and datasets in Power BI
- Data analysis in Power BI
- Model data in Power BI
- Get and transform data with Power BI
- Prepare data for analysis
- Get started with Microsoft data analytics

Outcomes: 48 students attended the workshop and gather the information

Beneficiaries: ADGITM students

Photographs of event with title: Workshop Photographs & certificates enclosed.
