REPORT

Workshop on "Prompt Engineering (Impromptu)"

Date of Event: 14th March 2024

Venue: AIML Smart Room (2202)

Objectives: The goal is to teach participants how to solve engineering problems fast. By showing them how to write clear prompts, use problem-solving tricks, and make the most out of ChatGPT.

Delegates (Speaker): Mr. Vikas Kumar (2nd year AIML Student)

Activities: Workshop on "Prompt Engineering"

Key Takeaways:

- Master clear and concise prompt writing.
- Acquire effective problem-solving techniques.
- Utilize ChatGPT for prompt solution generation.
- Gain confidence in addressing real-world engineering challenges promptly.

Description: The Department of AIML has organized a dynamic and interactive workshop on "Prompt Engineering" on 14th March 2024 by Speaker Mr. Vikas Kumar (2nd year AIML Student) in the AIML Smart Room. This workshop aimed to equip participants with the essential skills and techniques needed to address engineering challenges swiftly and effectively. Through engaging sessions and practical demonstrations, attendees learned the art of crafting clear and concise prompts, mastering problem-solving techniques, and leveraging ChatGPT as a powerful tool for generating prompt solutions.

The primary objective of the workshop was to enable students to learn from the speaker and gain knowledge on various aspects of prompt engineering. It also sought to explore the importance of prompt engineering in modern problem-solving contexts, offering insights into its application across different industries. The session encouraged active participation and interaction between the speakers and students, fostering a conducive environment for learning.

By the end of the workshop, participants left with a newfound confidence in their ability to tackle real-world engineering problems promptly. Armed with practical skills and strategies imparted by Vikas Kumar, attendees were ready to apply their newfound knowledge in various engineering contexts, enhancing their problem-solving abilities and adaptability in dynamic environments.

Outcomes: 61 students along with 8 faculty members benefited from the workshop.
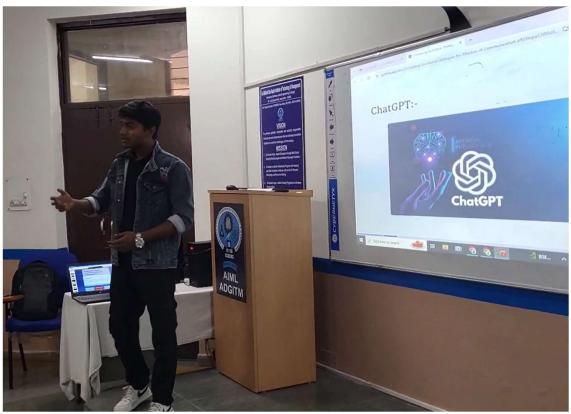

Beneficiaries: 1st and 2nd year students of AIML.
