REPORT

Workshop on “ARDUINO”

Date of Event: 19th September 2024

Venue: AIML Smart Room (2202)

Objectives: To introduce students with ARDUINO microcontroller for getting started with Robotics.

Speaker: Pradipta Shanu (AIML)

Activities: Workshop on “ARDUINO”

Key Takeaways:

- What is ARDUINO
- Types of Arduino
- Basic Setup
- Introduction to Hardware
- Introduction to Software
- Basics of Prototyping

Description: The Department of AIML organized a workshop on "Arduino" on 19th September 2024, led by “Pradipta Shanu”, a student from AIML, in the “AIML Smart Room”. Mr. Pradipta Shanu conducted an informative session that provided participants with valuable insights into “Arduino programming” and explored the fundamentals of “embedded systems”. The workshop aimed to familiarize students with the significance of “Arduino”, highlighting its applications in various electronics projects, and offering hands-on experience to enhance their skills in “hardware-software integration”. The primary objective of the workshop was to enable students to learn from the speaker and gain knowledge on various aspects of Robotics. It also sought to address why and how to use Robotics, offering insights into its practical applications. The session facilitated interaction between the speakers and students, culminating in a Q&A session followed by a demonstration for future reference.

The primary objective of the workshop was to introduce participants to Arduino microcontroller boards and provide them with hands-on experience in programming and interfacing sensors and actuators with Arduino. The workshop aimed to:

- Familiarize participants with the basics of Arduino hardware and software.
- Enable participants to build simple electronics projects.

- Encourage learning through practical experiments involving sensors, motors, and displays.

Interested students also got the opportunity to join the ongoing demonstration of the speaker and get hands-on experience of how ARDUINO are implemented in the day-to-day setup and practical application of the concepts discussed during the workshop.

Outcomes: 65 students along with 8 faculty members benefited from the workshop.

Beneficiaries: AIML, IT and AI&DS students.
