

Dated: 15/10/2025

REPORT

PROMPT ARENA

Date of Event: 15th October 2025

Venue: AIML Lab-1 (2203)

Objectives:

To encourage students to explore the creative potential of AI-powered image generation through effective prompt engineering, while gaining hands-on experience with modern AI tools and models.

Activities:

Participants were challenged to design and refine prompts on given topics using advanced AI tools such as ChatGPT, DeepSeek, and Blackbox to generate high-quality images. The event tested their ability to translate conceptual ideas into visually coherent and aesthetically appealing AI-generated outputs.

Key Takeaways:

- Students gained insights into prompt structure, coherence, and efficiency for image generation.
- Enhanced understanding of AI-driven creativity and visual content generation.
- Hands-on experience with AI tools for crafting precise prompts and optimizing results.

Description:

The Department of AIML organized “Prompt Arena” on 15th October 2025 in AIML Lab-1 (2203). The event aimed to introduce students to the art and science of prompt engineering in the domain of AI-based image generation. Participants were assigned diverse topics and tasked with creating visually captivating outputs through optimized prompts.

The competition focused on evaluating the clarity, creativity, and visual quality of the generated images, along with the technical accuracy of the prompts used. A total of 30 students from different academic years participated with great enthusiasm, showcasing their innovation and imagination. The event also featured expert guidance and an interactive Q&A session to deepen students' understanding of prompt engineering concepts and practical AI applications.

Outcomes:

Students demonstrated creativity, innovation, and technical proficiency in generating AI-based visuals. The event served as a platform for experiential learning, inspiring participants to explore the intersection of art, technology, and artificial intelligence through effective prompt design.
