REPORT

PROMPT THE BEAT

Date of Event: 20th February 2026

Venue: AIML Room No. 2203

Objectives: To introduce students to AI-powered music generation tools and to enhance prompt engineering skills and to produce better AI-generated results.

Activities: Students worked together to refine prompts and improve musical outputs, enhancing peer learning and communication skills and developed a clearer understanding of how structured, detailed, and creative prompts significantly influence AI-generated outputs and also given limited preparation time and then presented their prompts to a panel of judges.

Key Takeaways:

- To enhance prompt engineering skills by demonstrating how structured and creative prompts produce better AI-generated results.
- To encourage innovation and creativity through the fusion of technology and music.
- To foster interest in interdisciplinary applications of AI, combining technical knowledge with artistic creativity.

Description: “Prompt The Beat” was a techno-creative event organized by the Department of Artificial Intelligence and Machine Learning on 20th February 2026 at AIML Lab (Room 2203). The event aimed to explore the creative potential of Artificial Intelligence in the field of music generation through effective prompt engineering.

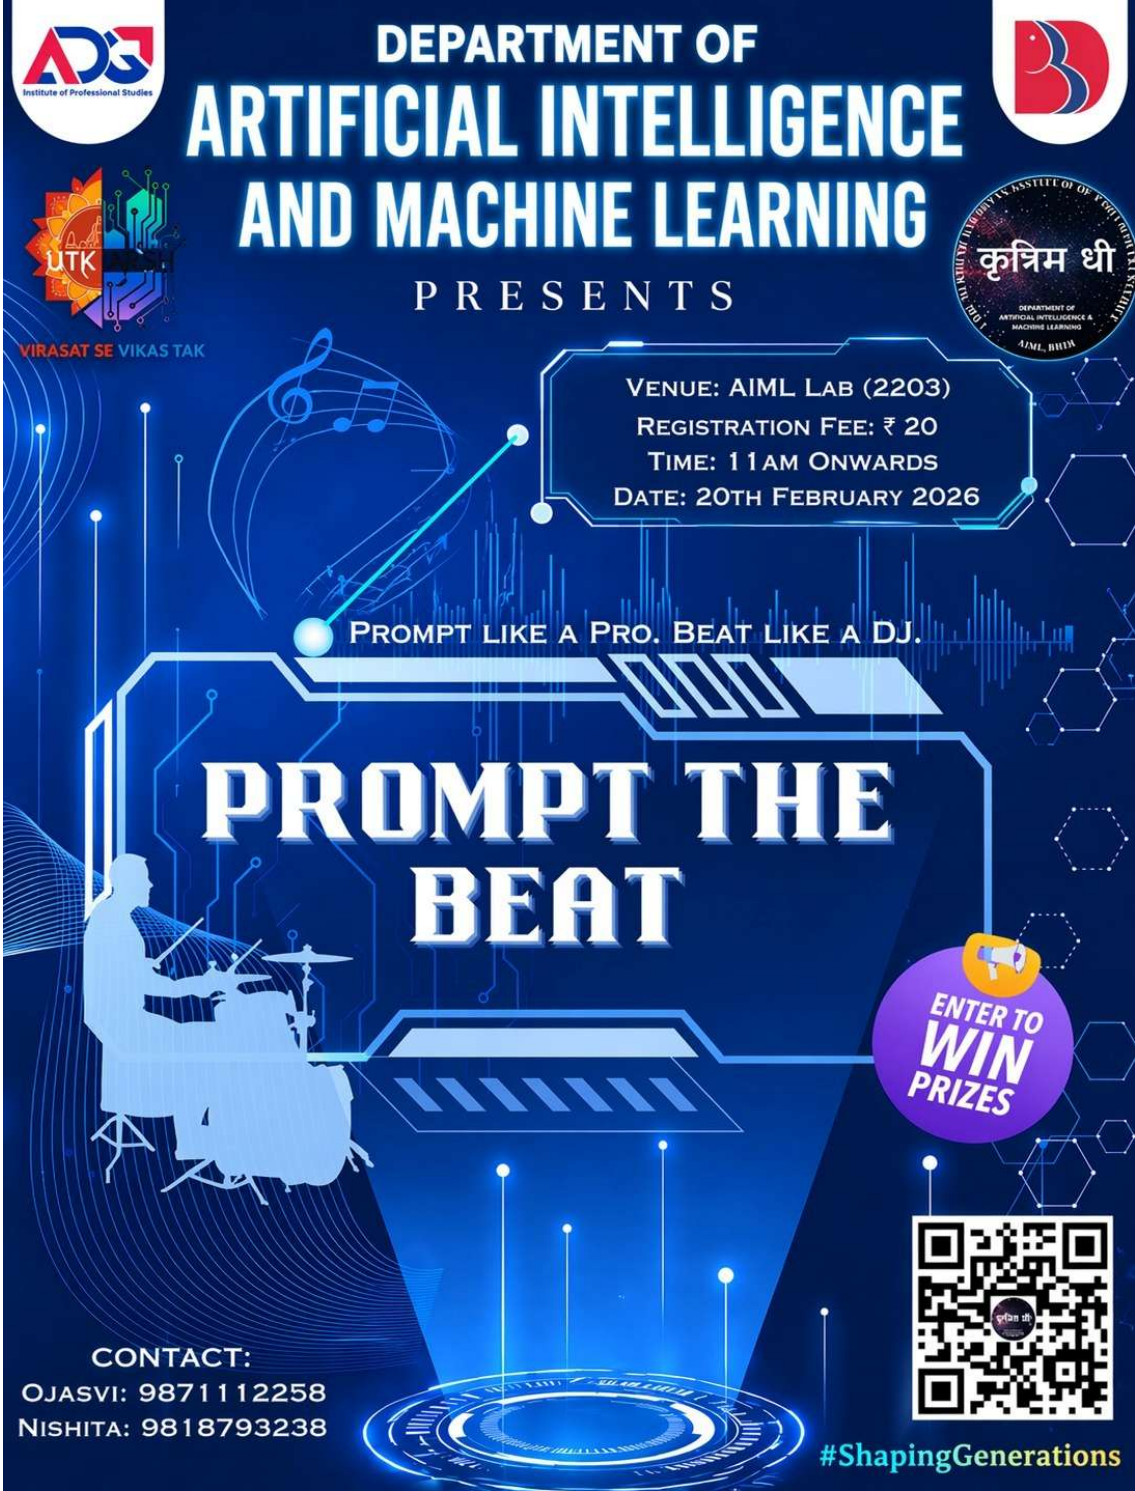

Participants were challenged to use AI tools to generate original beats and music compositions by crafting innovative and precise prompts. The event encouraged students to think creatively, experiment with AI-driven music systems, and understand how prompt design influences output quality.

The atmosphere was highly engaging, with students actively collaborating, refining their prompts, and experimenting with different musical styles. The event successfully blended technology with creativity, showcasing how AI can be used as a powerful tool for artistic expression.

Outcomes: 52 students along with 2 faculty members benefited from the event.

Beneficiaries: AIML, CSE, and ECE students.
